

Belgium ESRA3 Country Fact Sheet

Version 2 (01/2024)

ESRA (E-Survey of Road Users' Attitudes) is a joint initiative of road safety institutes, research centres, public services, and private sponsors from all over the world. The aim is to collect and analyse comparable data on road safety performance and road safety culture. The ESRA data are used as a basis for a large set of road safety indicators. These provide scientific evidence for policy making at national and international levels. Vias institute in Brussels (Belgium) initiated and coordinates ESRA, in cooperation with ten steering group partners (BASt, DTU, IATSS, ITS, KFV, NTUA, PRP, SWOV, TIRF, University Gustave Eiffel). At the heart of ESRA is a jointly developed questionnaire survey, which is translated into national language versions¹. The themes covered include: self-declared behaviour, attitudes and opinions on unsafe traffic behaviour, enforcement experiences and support for policy measures. The survey addresses different road safety topics (e.g. driving under the influence of alcohol, drugs and medicines, speeding, distraction) and targets car occupants, motorcyclists and moped riders, cyclists, riders of escooters and pedestrians.

This fact sheet contains the key results of the ESRA3 survey, which was conducted simultaneously in 39 countries in 2023. In total this online panel survey collected data from more than 37,000 road users (1,795 in Belgium, aged 18-74). The ESRA3 survey in Belgium was supported by Vias institute and the Belgian Federal Public Service Mobility and Transport. An overview of the initiative and more results are available on www.esranet.eu.

The following figures show a core set of variables in which Belgium (blue bar blue blue bar b

Self-declared behaviour Over the last 30 days, how often did you ...? (5-point scale from 1=never to 5=(almost) always) DUI as a car driver Speeding as a car driver Drive within 2 hours 13.4% Drive faster than the 49.7% after taking medication speed limit on that may affect your motorways/freeways 14.7% 58.0% driving ability Drive too fast for the Drive within 1 hour road/traffic conditions 7.2% 30.5% after taking drugs at the time (e.g., poor (other than prescribed visibility, dense or over the counter 8.5% 35.7% traffic, presence of medication) vulnerable road users) Drive faster than the 15.4% 52.8% Drive after drinking speed limit outside built-up areas (except alcohol 24.0% 58.7% motorways/freeways) Drive when you may have 11.6% 47.3% Drive faster than the been over the legal speed limit inside limit for drinking and 19.0% built-up areas 55.7% driving 0 10 15 20 25 0 20 40 60 % at least once (2-5) % at least once (2-5) Distraction & fatigue as a car driver Seat belt use in a passenger car Travel without wearing 14.7% Drive when you were so 18.4% your seatbelt in the sleepy that you had 15.0% front seat trouble keeping your 22.9% eyes open Travel without wearing 32.0% your seatbelt in the Read a message or check 23.2% 28.3% back seat social media/news while driving 23.0% Non-use of seatbelts 15.6% among children exempt* 14.2% from using CRS Talk on a hands-free 51.0% mobile phone while Non-use of CRS among driving 55.5% 18.3%
